Cloud & DevOps: AWS (Lambda, S3, RDS, EC2, CloudFront) | CI/CD Pipelines

Frontend: HTML | CSS | Bootstrap

Testing: Playwright | Jest

Other Technologies: Sequelize ORM | TypeORM

Tools: GitHub | GitHub Copilot | Claude Code | Amazon Q | Codex | Cursor AI | Postman

Soft Skills: Team Collaboration | Technical Problem Solving | Mentoring | Communication

WORK EXPERIENCE

Enqcode Technologies Pvt Ltd | August 2025 – Present

Full Stack Web Developer

- Building web applications for lead management systems and insurance claim management platforms for law firms.
- Currently developing a real-time cryptocurrency trading platform with advanced order execution, portfolio management, and market analytics.
- Leveraged AI-assisted development tools (GitHub Copilot, Claude Code, Amazon Q) to accelerate development, improve code quality, and automate debugging.
- Implemented serverless backend architectures using AWS Lambda, optimized database queries, and integrated third-party payment & market data APIs.
- Mentored junior developers on best practices, conducted code reviews, and collaborated on technical problem-solving.

Karvish Enterprise Pvt. Ltd. | August 2021 – July 2025

Full Stack Web Developer

- Designed and deployed full-stack web applications for sports management, gym management, and salon management platforms, each optimizing operational efficiency by 20-30%.
- Built a no-code/low-code application platform enabling rapid deployment of business applications (hiring management, employment tracking, time tracking systems).

- Developed specialized CRM solutions for sports academies and service-based businesses with role-based dashboards, reporting, and automated workflows.
- Implemented core business modules: recruitment pipelines, attendance & time tracking, billing & invoicing, expense management, inventory systems, and payroll processing.
- Integrated third-party services including payment gateways (Razorpay), mapping solutions (Google Maps), cloud storage (Google Drive, OneDrive), and communication APIs.
- Optimized PostgreSQL database architectures using TypeORM for performance and scalability across 3+ web applications.
- Automated testing using Playwright (UI) and Jest (backend), improving application reliability and reducing manual QA effort.
